

Louisiana Vaccination Policy – COVID-19
Date Written – November 2021

While the COVID-19 pandemic continues to affect our daily lives, the COVID-19 vaccines can provide significantly less exposure and safety to help employees and students of National Heritage Academies (NHA) combat the virus and return our schools to more normal operating procedures.

Although NHA is not mandating employees and students get the vaccine, we do highly recommend they receive the vaccine. NHA understands this is an important personal decision and therefore suggests that both employees and students consult with medical experts on whether to receive the vaccine. If the vaccination becomes required at any time, both employees and students will be communicated to appropriately.

If there are any questions around NHA's vaccination or COVID-19 policy, please feel free to email COVID@nhaschools.com.
