

# 1.0 Overview - SIP Workbook

Welcome to the School Improvement Plan (SIP) process! This online system is meant to capture the TRUE school improvement work your school does. This includes any time you analyze data, create strategic plans, and write action steps with your leadership team, DSQ, and teachers. While each section is based on the ESSA (Every Student Succeeds Act) and your state requirements, these are all activities that you already do. As much as possible, please use the work you have already done throughout the year to complete this plan.

Sections can be completed in any order and multiple people can edit at the same time.
