Question 1

Read the passage. There are several questions about this passage.

The White-Crowned Sparrow

- 1 Sparrows are small, common birds. They live in most parts of North America. There are many kinds of sparrows. These birds live in many different places, or habitats. Sparrows can live in the city or the country.

What They Look Like

- 2 White-crowned sparrows are one kind of sparrow. They are easy to spot. A white-crowned sparrow looks plain gray from far away. When seen up close, this bird has black and white stripes on its head. It also has a pale pink or yellow beak. Its chest is pale gray, and it has white bars on its wings. Its back is soft brown. The white-crowned sparrow's tail is long. The male and female birds look alike.

Where They Live

- 3 White-crowned sparrows live in bushy areas. Look for these birds in woodlands and thickets, which are areas with lots of trees and bushes. They scratch the ground for food in nearby open areas.

What They Eat

- 4 White-crowned sparrows eat many kinds of seeds, including sunflower seeds. They like grasses and grains, too. They eat some insects. They also like blackberries.

How They Nest

- 5 These birds make nests in shrubs. They build them up to ten feet high. The female makes the nest with twigs. Then she lines the nest with soft grass and feathers. The female lays 3-7 light blue-green eggs. The eggs have brownish spots. It takes the eggs 11-14 days to hatch.

How They Raise Their Young

- 6 After the eggs hatch, the female bird stays on the nest for 7-12 days. Both the males and females feed the young birds. Then the male sparrow keeps feeding the baby birds. The female starts to build another nest. She lays more eggs there.

What Their Song Sounds Like

- 7 The song of this bird sounds like a whistle. It sounds like "Poor-wet-wetter-chee-zee."
- 8 It is fun to watch for white-crowned sparrows. These birds are so common that they may live nearby. Their white and black heads make them easy to identify.
