

LEARNING *has* NEVER BEEN THIS FUN!

When your children are at Champions, they'll experience moments of wonder and discovery that will last a lifetime. A big part of that comes from our new curriculum. When you hear "curriculum," you may not naturally think "fun"—but we make sure that the two always go hand in hand. Our new School-Age curriculum is based on the latest educational research and builds the skills that have been proven to directly impact children's future success:

EXECUTIVE-FUNCTION SKILLS

Children learn better when they are focused and able to think before they act. Activities like strategy games give your children opportunities to build their mental flexibility and practice managing their emotions, all while fostering healthy competition and fun!

SOCIAL-EMOTIONAL DEVELOPMENT

With daily lessons in community building and character development, we help your children foster the kindness, empathy, and fairness that are so critical to success in life.

INQUIRY-BASED LEARNING

STEAM activities (Science, Technology, Engineering, Arts, and Math) give your children the freedom to discover, create, and tinker. We encourage that natural fascination with the world and empower children to build innovative and critical-thinking skills that will last a lifetime.

And there's more!

HOMEWORK HELP: Our teachers are here to support your children in completing homework, from science projects to spelling tests to book reports—which frees up time in the evenings for you to be together as a family.

CHILD CHOICE: Whether it's creative arts, the library, math and construction, puzzles and games, or science, the choice is theirs! Children aren't just given a choice in their activities—they're also given a voice! They can start their own clubs or projects based on what inspires them.

DAILY FITNESS AND HEALTHY SNACKS: We help children develop healthy bodies and encourage proper nutrition through daily physical activity and healthy snacks.

WE COULDN'T BE MORE EXCITED TO HELP YOUR CHILDREN LEARN AND GROW!
